

Mind Map

Your task: Whenever we learn new things our brain makes connections to other things we already know. You will create a visual map that shows how your brain connects the terms from a given unit. Your end result will be something like a web. Make your map look unique and artistic.

Instructions:

1. Create a list of 20 things (people, places, ideas, inventions, etc.) for the topic.
2. Create a rough draft of your mind map.
 - a. On a regular paper write the title of the unit in a bubble in the middle of the page.
 - b. Draw another bubble with one of the words from your list of 20 connected to the first bubble anywhere on the page.
 - c. Draw another bubble with another word. Connect it either to the first bubble or to the other word. (If they are related in some way).
 - d. Continue adding bubbles and connections until all 20 words are in a bubble and connected to some other bubble.
 - e. Look over your map and add a second connection for each bubble.**EACH BUBBLE MUST CONNECT TO AT LEAST 2 OTHER BUBBLES!**

3. Write your own definitions for 10 of the 20 words from your list in a complete sentence.
4. Choose any 10 connections you made on your map and explain why you made them in 1-2 complete sentences each. (Tell me how those two items are related other than “they both came from the same place”.) Number these 1-10 and write the number on the connection line.
5. On a large piece of construction paper create the final draft of your mind map.
 - a. If needed, rearrange your bubbles so connection lines can be as straight as possible.
 - b. Draw each bubble and word neatly. Use different colors throughout (you may choose to have your colors represent certain things, if you do be sure to include a legend showing this.)
 - c. Draw 5 pictures on your mind map which match up with either the words in the bubbles or the connections.
